

SKILLS

Programming Languages: Python, SQL, JavaScript

Web Technologies: HTML5, CSS3, JavaScript, REST APIs

Frameworks: Django, FastAPI, Flask

Databases: PostgreSQL, MySQL, SQLite

Software Development: Object-Oriented Programming, Data Structures, CRUD Operations, ORM, Authentication, Authorization, Debugging, Exception Handling, Query Optimization, Horizontal Scaling, Vertical Scaling

Tools & Platforms: Git, GitHub, Postman, Visual Studio Code, Render, Vercel, GitHub Pages

EDUCATION

Aditya College of Engineering and Technology

Aug 2022 – Jun 2026

Bachelor of Technology in Computer Science Engineering — 7.50 CGPA

Surampalem, Andhra Pradesh

Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks

TECHNICAL HIGHLIGHTS

- Solved **200+ SQL problems** involving joins, subqueries, Common Table Expressions, window functions, indexing, views, normalization, and query optimization.
- Applied core Python concepts including Object-Oriented Programming, exception handling, file handling, decorators, generators, regular expressions, multithreading, and database operations.
- Recorded **4,000+ GitHub contributions** and completed **20+ pull requests**, practicing branching, merging, rebasing, and conflict resolution.

PROJECTS

Staff Leave Management System | Live Demo

Mar 2026 – Apr 2026

Django, Python, JavaScript, HTML5, CSS3, Bootstrap, SQLite, Django ORM, Git

- Implemented role-based authentication and authorization for **2 user roles — Admin and Staff**, securing access to leave application, approval, and management workflows.
- Designed Django ORM models to manage **500+ records** covering employee profiles, leave requests, approvals, leave status, and related management data.
- Engineered and tested CRUD, search, filtering, validation, and approval workflows across **200+ users**, ensuring reliable end-to-end leave management.

Smart URL – URL Shortener | Live Demo

May 2026 – Aug 2026

Django, Python, PostgreSQL, Django ORM, HTML5, CSS3, JavaScript

- Developed a full-stack URL shortening application using **Django and PostgreSQL** to generate compact URLs and redirect users to their original destinations.
- Implemented database-backed URL management with **Django ORM**, supporting URL creation, validation, persistence, retrieval, and redirection workflows.
- Engineered secure user registration and authentication with password validation and **email-based OTP verification** for protected URL management.

Aadhaar Fraud Detection

Dec 2025 – Apr 2026

Python, Flask, YOLOv8, Tesseract OCR, Computer Vision, QR Code Detection

- Developed an automated Aadhaar document verification application using **Python, Flask, YOLOv8, and Tesseract OCR** to extract and validate identity information.
- Applied **YOLOv8-based document detection** and image preprocessing to process document images before extracting relevant text through OCR.
- Integrated **QR-code and pattern-based validation** with image-processing workflows to identify inconsistent or potentially manipulated document information.

CERTIFICATIONS

- SQL (Intermediate) Certificate** — HackerRank
- Software Engineer Certificate** — HackerRank
- Version Control Certificate** — LinkedIn Learning
- Python Full Stack Certification** — Dhee Coding Lab

ACHIEVEMENTS

- Earned **Pull Shark x2**, YOLO, Pair Extraordinaire, and Starstruck GitHub badges through repository activity.
- Completed **20+ GitHub pull requests** involving software development and repository contributions.
- Recorded **4,000+ GitHub contributions** through software development projects and repository activity.
